

## National Park Access Updates December 2024

### **Dilton Farm bridleway improvement works**

The surface works are complete. I am organising additional signage to be added and the project will be complete.

### **Volunteering**

We have relaunched our volunteering offer and are now offering four volunteering tasks per month with a focus on Nature Recovery and Path Improvements. The Volunteer Fair is planned for 26 Sunday.

### **National Grid Project updates**

We have installed fifteen oak signposts along the Landford and Hamptworth walking route. Further nature recovery work on the Cadland estate is planned for the Autumn Months.

We have been successful in our Breamore Railway bid. We will be appointed a staff member to work with HCC to project manage the improvement works which will enhance public access and encourage nature recovery in the National Park. This is a three-year project and works will start in earnest next year.
